

Ryhmä 7: Hilda Hermunen, Patrick Scott, Veera Ruotsalainen

Sprint 7 review

Scrum master: Hilda Hermunen

Trello Board Status

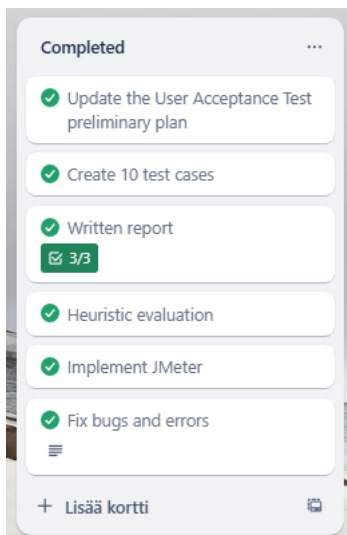

Figure 1: A screenshot of teams Trello board's Completed table from Sprint 7.

As shown in Figure 1, the team achieved the goals set for Sprint 7. The team reviewed and updated the user acceptance preliminary plan to take into account Sprint 7 requirements. The team created 10 test cases into Excel file template provided by the teacher. The test cases were then run by two team members and the results were documented into the Excel file. The team did heuristic evaluation to the project and wrote a report about the results. The team fixed any bug that came up in the results of the heuristic evaluation and the user acceptance testing. Lastly JMeter was implemented into the project.

Time spent by team members

Team member	Task assigned	Time spent
Veera	Create test cases (6 tests)	1 h
Hilda	Create test cases (4 tests)	1 h
Veera	Written report	2 h
Hilda	Written report	1 h
Veera	Heuristic evaluation	1 h
Hilda	Heuristic evaluation	1 h
Patrick	Heuristic evaluation	1 h

Veera	Fixing bugs	7 h
Hilda	Fixing bugs	7 h
Patrick	Fixing bugs	1 h
Hilda	JMeter	1 h

Obstacles encountered

No major obstacles encountered in this sprint. One critical error came up in the heuristic evaluation and user acceptance tests that required more work than expected. That work tightened the schedule a bit, but the team was able to overcome that obstacle.

Sprint 8 planning

Scrum master: Veera Ruotsalainen

Tasks

- Final presentation
 - The team will create a final presentation for the project. The presentation will be shown to the peers on the last class of the course.
 - The presentation will follow the template provided by the teacher.
 - The slides will be divided evenly between the team members.
 - Estimated time: 4 hours
- Final report
 - The team will write a final report of the project.
 - The report will follow the template provided by the teacher.
 - The documentation will be divided evenly between the team members.
 - Estimated time: 8 hours
- GitHub documentation
 - The team will update the documentation in the project GitHub. This includes adding missing files (e.g. ER diagram and other diagrams done for the project) to the doc folder and updating the README-file.
 - Estimated time: 3 hours
